DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Maslennikov has taught receiving a switch instruction along with its parameters, and loading a plurality of values associated with branch addresses, and then calling an instruction associated with one of those branch instructions using predicate form along with the parameter values.

Santhanam has taught the use of predicate registers, using them to indicate that a condition has been met, and that the associated instruction should be executed. Maslennikov and Santhanam have not taught, neither individually or in combination, where the range of addresses from the parameters has a high and low value and setting a first register value with a single bit, using a power of 2 equation, which indicates the correct predicate register to set and execute which corresponds with a particular branch address.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
